Forward-Looking Statements

This presentation, and other written or oral statements made from time to time by management contain “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995. The words “anticipate”, “believe”, “estimate”, “expect”, “intend”, “will”, “should”, “targeting”, “projecting”, “driving” and similar expressions, as they relate to us, our performance and/or our technology, are intended to identify forward-looking statements. These statements reflect management’s current beliefs, assumptions and expectations and are subject to a number of factors that may cause actual results to differ materially. Such factors include but are not limited to: our ability to address our business challenges in order to reverse revenue declines, reduce costs and increase productivity so that we can invest in and grow our business; our ability to attract and retain key personnel; changes in economic and political conditions, trade protection measures, licensing requirements and tax laws in the United States and in the foreign countries in which we do business; the imposition of new or incremental trade protection measures such as tariffs and import or export restrictions; changes in foreign currency exchange rates; our ability to successfully develop new products, technologies and service offerings and to protect our intellectual property rights; the risk that multi-year contracts with governmental entities could be terminated prior to the end of the contract term and that civil or criminal penalties and administrative sanctions could be imposed on us if we fail to comply with the terms of such contracts and applicable law; the risk that partners, subcontractors and software vendors will not perform in a timely, quality manner; actions of competitors and our ability to promptly and effectively react to changing technologies and customer expectations; our ability to obtain adequate pricing for our products and services and to maintain and improve cost efficiency of operations, including savings from restructuring actions; the risk that confidential and/or individually identifiable information of ours, our customers, clients and employees could be inadvertently disclosed or disclosed as a result of a breach of our security systems due to cyber attacks or other intentional acts; reliance on third parties, including subcontractors, for manufacturing of products and provision of services; the exit of the United Kingdom from the European Union; our ability to manage changes in the printing environment and expand equipment placements; interest rates, cost of borrowing and access to credit markets; funding requirements associated with our employee pension and retiree health benefit plans; the risk that our operations and products may not comply with applicable worldwide regulatory requirements, particularly environmental regulations and directives and anti-corruption laws; the outcome of litigation and regulatory proceedings to which we may be a party; any potential termination or restructuring of our relationship with Fujifilm Holdings Corporation; the proposed holding company reorganization; the occurrence and timing of any closing of the proposed holding company reorganization; the shared services arrangements entered into by the Company as part of Project Own It; any potential strategic transaction involving our customer financing business and/or related assets; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of our 2018 Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K filed with the SEC. These forward-looking statements speak only as of the date of this presentation or as of the date to which they refer, and Xerox assumes no obligation to update any forward-looking statements as a result of new information or future events or developments, except as required by law.

Key Financial Measures | Q2 2019

3 ⁽¹⁾ Adjusted Measures, Free Cash Flow and Constant Currency: see Non-GAAP Financial Measures.

Strategic Initiatives to Transform Xerox

Optimize operations for simplicity

- Simplify operating model for greater accountability and efficiency
- Optimize the supply chain and supplier competitiveness
- Make it easier to do business with Xerox

Drive revenue

- More effectively support customers
- Sell higher-value services and integrated solutions
- Expand software and services offerings

Re-energize the innovation engine

- Focus investments in growing market segments such as AI and IoT
- Leverage expertise to develop differentiated technology
- Monetize new innovations

Focus on cash flow and increasing capital returns

- Maximize cash flow generation
- Return at least 50% of free cash flow to shareholders
- Focus on ROI and internal rate of return to make capital allocation decisions

Frequently Asked Questions

What additional investments are you planning to make in your business?

During our Investor Day, we committed to investments of \$0.32 in EPS to support our strategic initiatives. With strong margin expansion YTD, we are increasing investments in 2019 to be approximately \$0.40 in EPS, primarily in revenue-generating initiatives, including channel and large account expansion, eCommerce, software sales specialists, supplies penetration, and IT services expansion.

What is the progress of Project Own It?

Project Own It is a multi-year program to simplify our operations and instill a culture of continuous improvement. It is currently on track to deliver at least \$640 million of gross savings in 2019, from which we have already seen operating margin expansion (including 170 basis points of adjusted¹ operating margin expansion in Q2). We have also begun planning the next phase of Project Own It initiatives, which we believe will result in \$450 million of gross savings in 2020.

What is the status of the potential sale of the leasing business?

We continue to evaluate strategic alternatives for our leasing business. This is an important decision, so we are taking a methodical approach that is focused on doing the appropriate amount of due diligence on potential structures and partners. Regardless of the outcome, we are committed to maintaining a strong balance sheet while ensuring our clients continue to have seamless access to high-quality product offerings.

What are the implications from the agreement that you recently entered with HP?

We recently expanded our existing sourcing relationship with HP to include certain A4 and entry-level A3 products, furthering our supply diversification. In addition, this agreement enables us to add volume to our toner operations, and broaden our software and services portfolio.

Non-GAAP Financial Measures

Non-GAAP Financial Measures

We have reported our financial results in accordance with generally accepted accounting principles (GAAP). In addition, we have discussed our financial results using the non-GAAP measures described below. We believe these non-GAAP measures allow investors to better understand the trends in our business and to better understand and compare our results. Accordingly, we believe it is necessary to adjust several reported amounts, determined in accordance with GAAP, to exclude the effects of certain items as well as their related income tax effects.

A reconciliation of these non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with GAAP are set forth below as well as on our website at www.xerox.com/investor.

These non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the company's reported results prepared in accordance with GAAP.

Adjusted Earnings Measures

- Net income and Earnings per share (EPS)
- Effective tax rate

The above measures were adjusted for the following items:

- Amortization of intangible assets: The amortization of intangible assets is driven by our acquisition activity which can vary in size, nature and timing as compared to other companies within our industry and from period to period. The use of intangible assets contributed to our revenues earned during the periods presented and will contribute to our future period revenues as well. Amortization of intangible assets will recur in future periods.
- Restructuring and related costs: Restructuring and related costs include restructuring and asset impairment charges as well as costs associated with our transformation programs beyond those normally included in restructuring and asset impairment charges. Restructuring consists of costs primarily related to severance and benefits paid to employees pursuant to formal restructuring and workforce reduction plans. Asset impairment includes costs incurred for those assets sold, abandoned or made obsolete as a result of our restructuring actions, exiting from a business or other strategic business changes. Additional costs for our transformation programs are primarily related to the implementation of strategic actions and initiatives and include third-party professional service costs as well as one-time incremental costs. All of these costs can vary significantly in terms of amount and frequency based on the nature of the actions as well as the changing needs of the business. Accordingly, due to that significant variability, we will exclude these charges since we do not believe they provide meaningful insight into our current or past operating performance nor do we believe they are reflective of our expected future operating expenses as such charges are expected to yield future benefits and savings with respect to our operational performance.

Non-GAAP Financial Measures (cont'd)

- Non-service retirement-related costs: Our defined benefit pension and retiree health costs include several elements impacted by changes in plan assets and obligations that are primarily driven by changes in the debt and equity markets as well as those that are predominantly legacy in nature and related to employees who are no longer providing current service to the company (e.g. retirees and ex-employees). These elements include (i) interest cost, (ii) expected return on plan assets, (iii) amortization of prior plan amendments, (iv) amortized actuarial gains/losses and (v) the impacts of any plan settlements/curtailments. Accordingly, we consider these elements of our periodic retirement plan costs to be outside the operational performance of the business or legacy costs and not necessarily indicative of current or future cash flow requirements. This approach is consistent with the classification of these costs as non-operating in other expenses, net. Adjusted earnings will continue to include the service cost elements of our retirement costs, which is related to current employee service as well as the cost of our defined contribution plans.
- Transaction and related costs, net: Transaction and related costs, net are expenses incurred in connection with Xerox's planned transaction with Fuji, which was terminated in May 2018, as well as costs and expenses related to the previously disclosed settlement agreement reached with certain shareholders and litigation related to the terminated transaction and other shareholder actions. These costs are considered incremental to our normal operating charges and were incurred or are expected to be incurred solely as a result of the planned combination transaction and the related shareholder settlement agreement and litigation. Accordingly, we are excluding these expenses from our Adjusted Earnings Measures in order to evaluate our performance on a comparable basis.
- Restructuring and other charges - Fuji Xerox: We adjust our 25% share of Fuji Xerox's net income for similar items noted above such as Restructuring and related costs and Transaction and related costs, net based on the same rationale discussed above.
- Other discrete, unusual or infrequent items: We excluded the following items given their discrete, unusual or infrequent nature and their impact on our results for the period:
Fourth Quarter and Full Year 2018 - Contract termination costs associated with a minimum purchase commitment for IT services.
Full Year 2017 - Losses on early extinguishment of debt.
First Quarter 2019, Full Year 2017 and 2018 - Impacts associated with the Tax Cuts and Jobs Act (the "Tax Act") enacted in December 2017.

We believe the exclusion of these items allows investors to better understand and analyze the results for the period as compared to prior periods and expected future trends in our business.

Non-GAAP Financial Measures (cont'd)

Adjusted Operating Income/Margin

We calculate and utilize adjusted operating income and margin measures by adjusting our reported pre-tax income and margin amounts. In addition to the costs and expenses noted as adjustments for our Adjusted Earnings measures, adjusted operating income and margin also exclude the remaining amounts included in Other expenses, net, which are primarily non-financing interest expense and certain other non-operating costs and expenses. We exclude these amounts in order to evaluate our current and past operating performance and to better understand the expected future trends in our business.

Constant Currency

To better understand trends in our business, we believe that it is helpful to adjust revenue to exclude the impact of changes in the translation of foreign currencies into U.S. dollars. We refer to this adjusted revenue as "constant currency." This impact is calculated by translating current period activity in local currency using the comparable prior year period's currency translation rate. This impact is calculated for all countries where the functional currency is not the U.S. dollar. Management believes the constant currency measure provides investors an additional perspective on revenue trends. Currency impact can be determined as the difference between actual growth rates and constant currency growth rates.

Free Cash Flow

To better understand trends in our business, we believe that it is helpful to adjust operating cash flows by subtracting amounts related to capital expenditures. Management believes this measure gives investors an additional perspective on cash flow from operating activities in excess of amounts required for reinvestment. It provides a measure of our ability to fund acquisitions, dividends and share repurchase. In 2017, we also adjusted operating cash flows for the impacts associated with the incremental voluntary contributions to our U.S. defined benefit pension plans and the termination of our accounts receivable sales programs in the fourth quarter 2017. We adjusted for these impacts due to the one-time nature of the actions as well as to enable investors to better understand and analyze our operating cash flows as compared to prior periods and expected future trends.

Summary:

Management believes that all of these non-GAAP financial measures provide an additional means of analyzing the current period's results against the corresponding prior period's results. However, these non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the company's reported results prepared in accordance with GAAP. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. Compensation of our executives is based in part on the performance of our business based on these non-GAAP measures.

A reconciliation of these non-GAAP financial measures and the most directly comparable measures calculated and presented in accordance with GAAP are set forth on the following tables:
